Implementation of revised CTIS transparency rules

Implementation of revised CTIS transparency rules

As of 18 June 2024, the [Revised CTIS transparency rules](#) are the publication rules of the [Clinical Trial Information System](#):

- All trials submitted on or after 18 June follow the principles and timelines defined in the revised rules
- Trials submitted to CTIS before 18 June are considered 'historical' and have only their structured data published, see ['historical trials'](#) section

Revised rules: modality of disclosure of CTIS trials' information

Chapter 2 of [Guidance document on how to approach the protection of personal data and commercially confidential information while using the CTIS](#)

Revised rules: modality of disclosure of CTIS trials' information

The **most recent** authorised application of any trial, as well as any 'not authorised' initial application, is made publicly available as per timelines based on:

- trial category, selected in the 'Form' section as per below table
- population age
- trial phase (*in case of category 2 trials that are integrated phase 1&2*)

| Category | Trial type |
|--|--|
| Category 1 Pharmaceutical development clinical trials | Phase I clinical trials in healthy volunteers or patients Phase 0 trial in healthy volunteers or patients Bioequivalence and bioavailability trials Similarity trials for biosimilars Equivalence trials for combination or topical products |
| Category 2 Therapeutic exploratory & confirmatory clinical trials | Phase I and phase II integrated clinical trials Phase II clinical trials Phase II and phase III integrated clinical trials Phase III clinical trials |
| Category 3 Therapeutic use clinical trials | Phase III and phase IV integrated clinical trials Phase IV clinical trial and low interventional trials |

Publication of structured data

| Clinical study report, <i>if available</i> | As soon as submitted (<i>requirement: 30 days from MA</i>) | | |
| <i>All other documents, including any MS document</i> | Never | | |

As of 18 June 2028, for any application created before this date

For all those documents that are no longer published (e.g. IB), the system had to remove the former version 'for publication', unless no 'not for publication' version was linked to it

Examples are in the next slide

Note [question 1.9 of Q&A](#): when submitting a modification application of those trials, sponsors are not requested to re-upload the clean versions of those documents 'not for publication' that are no longer available. Only the clean version and corresponding track-changes version of those documents that have been modified as part of the application should be uploaded, unless MSCs requests further uploads.

| Before 18 June, sponsor had uploaded: | | As of 18 June, Sponsor/MS sees, in the same placeholder: |

In some cases, users could still see both 'for publication' and 'not for publication' versions. Note that also in these cases the document is not published.

Historical trials, submitted before 18 June 2024

Section 2.3 of [Guidance document on how to approach the protection of personal data and commercially confidential information while using the CTIS](#)

Historical trials: what is published and when

For all those CTIS applications **submitted*** before 18 June 2024:

- the structured data are published for all trials' categories as per revised rules
- **documents are not published** (*this applies to all historical trials, regardless of the previous use of deferrals or publication status*)

The following kinds of CTIS applications **submitted*** on or after 18 June 2024 will trigger publication of those documents that are in scope of the application and of the revised rules:

- Substantial Modifications (part I and/or part II)
- Non-Substantial Modification part II
- Additional Member State (triggering publication of part II docs only)

→ **documents in scope of publication should be redacted accordingly**

**the date determining whether a trial is 'historical' or not, is the submission date, not the date of creation of your draft*

Historical trials: what is published and when

NSM and AM applications done on 'historical trials' do not trigger the publication of part I documents: this is because through these two kinds of applications, it is not possible for sponsors to update and therefore redact those documents in scope of publication

→ for an application that is submitted to CTIS on any 'historical' trial, the documents in scope of publication that are feasible to be modified through the application are going to be published and **should be redacted accordingly**

Example, for an initial application submitted before 18 June 2024, the latest version of its structured data was published on 18 June 2024 while its documents are not published; if, on this trial:

- A SM-1 is submitted, with the purpose of updating the IB: protocol and synopsis will be published as per revised rules and should be redacted accordingly. Note: part II documents will not be published
- A NSM-1 is submitted: this triggers an update of the structured data and not of any document
- A NSM part 1&2 is submitted: this triggers publication of part II documents only & update of all structured data fields.

Note: submission of trial notifications or results do not trigger publication of application's documents of the same trial.
